# Algebra

Find the value of  $y$ .

1.  $12y = 108$

11.  $6y + 15 = 45$

2.  $9y = 54$

12.  $9y + 15 = 60$

3.  $11y = 99$

13.  $4y + 13 = 33$

4.  $14y = 28$

14.  $7y + 8 = 50$

5.  $9y = 45$

15.  $5y + 19 = 79$

6.  $7y = 42$

16.  $12y - 12 = 48$

7.  $10y = 80$

17.  $8y - 13 = 27$

8.  $15y = 45$

18.  $5y - 10 = 15$

9.  $6y = 48$

19.  $3y - 13 = 20$

10.  $5y = 55$

20.  $6y - 12 = 60$

# Algebra

Y has been replaced with its answer.

1.  $12 \times \underline{9} = 108$

11.  $6 \times \underline{5} + 15 = 45$

2.  $9 \times \underline{6} = 54$

12.  $9 \times \underline{5} + 15 = 60$

3.  $11 \times \underline{9} = 99$

13.  $4 \times \underline{5} + 13 = 33$

4.  $14 \times \underline{2} = 28$

14.  $7 \times \underline{6} + 8 = 50$

5.  $9 \times \underline{5} = 45$

15.  $5 \times \underline{12} + 19 = 79$

6.  $7 \times \underline{6} = 42$

16.  $12 \times \underline{5} - 12 = 48$

7.  $10 \times \underline{8} = 80$

17.  $8 \times \underline{5} - 13 = 27$

8.  $15 \times \underline{3} = 45$

18.  $5 \times \underline{5} - 10 = 15$

9.  $6 \times \underline{8} = 48$

19.  $3 \times \underline{11} - 13 = 20$

10.  $5 \times \underline{11} = 55$

20.  $6 \times \underline{12} - 12 = 60$
